Indrajeet Jadhav

Enterprise Product Designer with 5+ years of experience designing complex B2B and enterprise products across web and mobile. Skilled in UX strategy, product design, workflow optimization, data-driven experiences, design systems, and user research. Experienced in translating business requirements into scalable product experiences, collaborating with Product Owners, developers, and cross-functional teams. Strong in product thinking, Agile/Scrum, frontend collaboration, and AI-assisted design.

Skills

Product Design & UX

- User Research
- Wireframing & Prototyping
- Usability Testing
- Information Architecture
- Product Design
- Enterprise UX
- UX Strategy
- Interaction Design
- Workflow Optimization
- Responsive Design (Mobile & Desktop)
- Accessibility & Usability
- HCI
- Design Thinking
- User-Centered Design
- Human Factors Engineering

Product & Agile

- Product Thinking
- Requirements Analysis
- Cross-Functional Collaboration
- Acceptance Criteria
- Agile / Scrum
- Product Backlog
- Prioritization
- Stakeholder Management
- User Stories

Tools & AI

- Figma
- Adobe XD
- Notion
- ChatGPT
- Claude
- Cursor

Frontend & Technical

- HTML
- CSS
- JavaScript
- AngularJS
- Design-to-Development Collaboration
- Bootstrap

Work Experience

SLB - Schlumberger (Sensia) Enterprise UX Designer | 24th Feb 2024 -Present

- Design enterprise-grade digital products involving complex workflows, monitoring systems, and data-driven experiences.
- Translate business requirements and user needs into intuitive, scalable product experiences aligned with product goals and technical feasibility.
- Collaborate with Product Owners, developers, and global stakeholders throughout product discovery, design, and delivery.
- Conduct user research, workflow analysis, usability evaluations, and stakeholder discussions to identify pain points and improve product experiences.
- Apply UX strategy, interaction design, information architecture, and design systems to simplify complex workflows and create consistent enterprise experiences.
- Develop user flows, wireframes, high-fidelity prototypes, and reusable UI patterns, leveraging AI-assisted workflows to accelerate research, ideation, and design exploration.
- Drive end-to-end product design from problem discovery and requirement analysis through ideation, prototyping, validation, and design handoff, ensuring alignment between user needs, business goals, and technical feasibility.

AVALON – Enterprise Monitoring & Management Platform

- Redesigned a legacy enterprise application into a modern, modular, and scalable product experience, improving usability and consistency across multiple application modules.
- Re-engineered complex workflow-driven user journeys through improved information architecture, navigation, and interaction design to simplify task completion.
- Designed and established scalable design system patterns and reusable components, improving UI consistency, maintainability, and design-to-development efficiency.

Avocet Mobile – Enterprise Mobile Operations Platform

- Led the UX redesign of an enterprise mobile application, transforming complex data-entry workflows into guided, task-oriented experiences for field users.
- Designed end-to-end mobile workflows for multi-site operations, improving information visibility, navigation, and task efficiency across complex operational scenarios.
- Designed experiences for offline and field environments, considering real-world usage constraints, connectivity limitations, and user context.
- Designed key product experiences including dashboards, maps, search, multi-step workflows, and online/offline states to support efficient field operations.
- Collaborated with Product Owners, developers, and cross-functional teams to translate business requirements into scalable and implementation-ready mobile solutions.

IASYS Technology Solutions pvt ltd 7th June 2021 – 24th Feb 2024

Combine BRIX application – UI UX Designer / Frontend Developer

- Redesigned legacy enterprise applications into modern, modular, and scalable platforms, improving usability, workflow efficiency, visual consistency, and long-term maintainability across multiple application modules.
- Revamped complex workflow-driven user journeys through user research, usability evaluations, interaction design, and information architecture improvements to enhance overall product experience and operational efficiency.
- Introduced scalable design systems and reusable UI patterns to standardize components, improve cross-product consistency, and accelerate development workflows across enterprise applications.

Frontend & Development Experience

- Developed responsive user interfaces using HTML, CSS, JavaScript, Bootstrap, AngularJS, and React.js, ensuring seamless alignment between design concepts and frontend implementation
- Leveraged frontend development expertise to bridge the gap between design and engineering teams, improving implementation feasibility, design consistency, and overall product development efficiency.

Certifications

1. Google UX Design Professional Certificate
2. Enterprise Design Thinking – IBM
3. Advance Figma Design
4. Advance Bootstrap 5
5. Human Computer Interaction
6. Product Owner – IBM

Education

- Tatyasaheb Kore Institute Of Engineering And Technology, Warananagar.
- Percentage :67% 2021 [B.E – CSE]
- Yashwantrao Chavan Warana Mahavidyalay, Warananagar.
- Percentage :58% 2016 [HSC]
- Tatyasaheb Kore English Academy.
- Percentage :69% 2014 [SSC]
